For Universities, Colleges
& Schools

About The Gemini University ERP

The Gemini University ERP (Enterprise Resource Planning) is more of a long-term commitment than the integrated and specialized software solution for any educational institution / University for providing students, faculty, and staff with highly effective tools to help them support and improvise on learning, discovery, and engagement. University ERP is primarily an initiative to replace universities administrative computing systems with a new integrated system. The processes that will be affected by the ERP implementation shall include Admission, Academics, Examination, Human Resource Management System, Financial Accounting, Budgeting, Research and many other areas. It provides for an effective Decision Support System to manage the entire operations and helps in taking timely decisions. Implementing university ERP should thus be an ideal choice in improving and expanding student and faculty services in any university or educational institution. University ERP supports institutions of all sizes and types as an integrated suite of proven, scalable, enterprise-wide application on a single database.

Major Objective:

- Encourage competition in education system to computerize the core departments and functions of the university to maintain efficient and faster movement of information.

- To computerize the examination processes and declare the results well in time while maintaining utmost confidentiality.

- To computerize the Student data and enable the University to issue smart cards so that single identity can be maintained. It also helps in making campus more safe & secure for its students and others.

- Improve utilization of technology and information systems in academic and administrative processes.

Key Features:

- **Centralized Web Based System**
- **Availability of Real-time Business Information at all levels.**
- **Consistent & highly Secured System.**
- **Provides Effective Decision Support System (DSS) that helps in Timely Decision Making.**
- **Faster and Automatic Report Generation.**
- **Helps in Reducing Paperwork and Manual Filing and Record Keeping**
- **Productivity Enhancement for Staff as Well as Students Due to Instant Availability of Critical Information.**
- **Highly Interactive & User Friendly Interface**
- **Highly secure with multiple level checks and user authentication**
- **Exporting of reports to MS-Word, MS-Excel, PDF documents**
- **Ensures Better Coordination and Workflow Between Departments.**

Staff

Minimize workload of your staff and improve productivity. Campus empowers faculty to manage student assignments, research work, financials and various other tasks online.

University

One platform to stay updated with every aspect of university work. From results to hostel management, get real time data and insights about every field within few clicks.

Students

Give your students the ease of completing time consuming and tiring chores online. Campus simplifies library, finance, registration, and academics related tasks.

Benefits To Management

- Availability of real-time information.
- Easy command, control and communication.
- Budget control system.
- Financial planning.

- Book Submission Reminder
- Attendance Of Students
- Subject Specialization Report
- Campus News
- Academic Calendar
- Training & Placement
- Assignment Management
- Lost & Found
- Employee Feedback & Suggestions

Benefits Technology Wise

- High level security
- Using best servers with unlimited bandwidth and speed.
- Plug and Play integration for each module.
- Easy to customize and change in information as per institute requirement
- Provides real time information.
- Transparency in operations.
- Used 3-tier architecture and Object Oriented Programming.

Core Modules:

Software Dashboard

- Dashboard reflects a well understood structure of the entire business
- Shortcut keys, reminders, a well versatile handy information readily available
- Information can be spread or notify to the users effortlessly
- Can plan & manage tasks of the day in a well organized structure
- Can be easily accessed by the mobile device
- Can be customized according to the business needs
- Personalized view to enjoy an ease in assigned task
- Rated as the most resourceful feature by the numerous users
- Notifications of key performance indicators

Admission Management

- Admission formalities can be done in best organized way
- Summarized report generation with complete admission details
- Centralized data management process for multiple branches
- Facilitate anywhere, anytime access and monitoring is trouble-free
- Maintenance of transparency with student and parents
- Admission receipt generation
- Daily monetary collection report
- Supervision of multiple branches by single login
- Multi-located branched integration
- Incorporation with enquiries management

Attendance Management

- Biometric attendance management
- Attendance by login facility with configured IP settings
- Student wise attendance percentage (%) reports
- Policies can be implemented in pre-structured surroundings
- Maintenance of transparency with student and parents
- Flexibility can be provided and administered
- Error can be shunned
- Saves time and labour with its unique automated system with multiple facilitation

Fee Management

- Consolidated fee structure report for the entire course tenure
- Automated Fee collection reminders
- Online tracking of collections, pendency's, dues of fees in a most convenient way
- Online fee submission via secured payment gateways
- Transparency can be maintained and fraud transaction can be avoided
- Fee structure can be customized according to the requirement
- Amplify profits for the college by management of payments from alumni, donors and other contributors
- Automatic backup's stored at multiple locations

- Integrated with biometric attendance feature

Transportation Management

- Centralized transportation management with ample visibility
- Online organization of time charts, routes, drivers, bus numbers etc
- Reports analysis and GPS tracking system
- Messages can be send to the students regarding any modifications
- Regular updates generation

Examination and Result

- exams conductions via secured login's
- Online results declaration
- Complete student assessment reports for the entire tenure
- Self evaluation assignments and questions paper
- Examination and sets management
- Well organized examination location and student distribution
- Examination fee collection, fine collection, Payment mode reports
- Secured and advanced multifaceted user interface from desired location
- Cost saving and paper saving
- Transparency of examination results for guardians
- Grading assessment system integration

Library Management

- Computerized design allows library staff to provide services easily and quickly
- Excel Import/Export facility for easy maintenance of book records
- Books category management
- Comprehensive reports of issued, overdue, fine applicable, defaulters, circulation etc
- Books are easily located within the racks
- E-library members management
- Books acquisition record and requirement
- Subscriptions and membership management
- Multi located library featured setup
- High security and customized access rights can be managed
- Additional features add-on's available
- Barcode generation and printing facility
- Restoration and data backup facility
- Revenue collection via fine's, donations reports

Hostel Management

- Hostel management software increase efficiency with minimal manpower requirements
- Integration with admission module
- Auto transfer information after selecting hostel checkbox while admissions
- Software has facility of categorized allocation of rooms to the registered students
- Complete record of food, logging, laundries and other facilities
- Information can be circulated via one click SMS
- Hostel expenses detailed report
- All the information is accessible to the administrative department
- Most efficient method to manage all the activities within the premises
- Hostel fee payments reminders alert can be send through software
- Hostel movement and activities reports

Store Management

- Online record of available stock centralized for all branches
- Online requisition form with multiple approval interfaces
- Purchase order can be mailed directly
- Auto stock updating on receipt of the ordered material
- Highly designed and fully integrated advanced version
- Customized category and material management
- Accuracy in inventory orders and supplies
- Increase in productivity & elimination of faults
- Multiple functionalities setting for each department

Placement Management

- Student batches details and important information storage
- Documents and CV unload/Download options
- Job Category Management
- Email, SMS and Reminders facility
- Complete data management and processing
- Placement software has Inter-connectivity with result declaration
- Placement ratio reports and pendency track report
- Registered companies management in campus placements
- Shortlisted and correspondence management
- Pre placement and post placement activity manager

Employee & Student Panel

- Employees can login into their accounts
- Attendance, Leaves, personal information can be viewed and updated
- Online grievances management system
- A clear view of KRA's can be mentioned to be followed
- Employee can submit their daily work done report
- Online request form to save time and increase productivity
- Online inductions programs for the better well organized environment
- Outstanding for employee employer relations
- Student login panel acts as a most important module in the software
- Students can login to view the date sheet, results and other information
- Import dates can be updated within enables the students to catch each activity
- Student grievances can be handled without any hassle
- Student can stay well conned with the college
- Professional approach to manage student requirements
